

Bug No. 1 - Priority **Blocker**

Bug Description:
There is no CVC field in the payment information
Reproduction Steps:
- Check the “Account information” form
- Check the upper part of the form where the payment information is shown.
Actual Behaviour:
There is no CVC/CVV field in the payment information.
Expected Behaviour:
There should be a CVC/CVV field in the payment information otherwise the user cannot proceed with the payment.

Bug No. 2 - Priority **Blocker**

Bug Description:
There is no credit card holder field in the payment information
Reproduction Steps:
- Check the “Account information” form
- Check the upper part of the form where the payment information is shown.
Actual Behaviour:
There is no credit card holder field in the payment information.
Expected Behaviour:
There should be a credit card holder field in the payment information otherwise the user cannot proceed with the payment.

Bug No. 3 - Priority **Blocker**

Bug Description:
There is no country field in the address section
Reproduction Steps:
- Check the “Account information” form
- Check the lower part of the form where the address section is shown.
Actual Behaviour:
There is no country field in the address section
Expected Behaviour:
There should be a county field in the address section. Since it is a mandatory field and not available in the UI, there might be issues with the payment process.

Bug No. 4 - Priority **Critical**

Bug Description:
No currency in the payment amount field
Reproduction Steps:
- Check the “Account information” form
- Check the “Payment amount” field
Actual Behaviour:
There is no currency for the amount displayed.
Expected Behaviour:
Currency of the payment amount should be displayed after or before the amount depending on the locale.

Bug No. 5 - Priority **High**

Bug Description:
VISA preselected in the “Card type” dropdown list.
Reproduction Steps:
- Check the “Account information” form
- Check the “Card type” field
Actual Behaviour:
VISA is preselected in the dropdown list
Expected Behaviour:
There should be no credit card pre-selected in the dropdown list. Please instead display a message “Select a card type”.

Bug No. 6 - Priority **Medium**

Bug Description:
“Continue” button is displayed on the left of the cancel button.
Reproduction Steps:
- Check the “Account information” form
- Check the buttons in the bottom of the form
Actual Behaviour:
“Continue” button is displayed on the left of the cancel button.
Expected Behaviour:

As a user, I am used to see the “Continue” button on the right side and the “Cancel” button on the left side.

Bug No. 7 - Priority **Medium**

Bug Description:
“Billing street address” label is wrongly named
Reproduction Steps:
- Check the “Account information” form
- Check the “Billing street address” label
Actual Behaviour:
“Billing street address” label is wrongly named
Expected Behaviour:
Please name the label either “Billing address” or “Street address”

Bug No. 8 - Priority **Low**

Bug Description:
“Date” is missing after “Expiration” label in the payment information
Reproduction Steps:
- Check the “Account information” form
- Check the upper part of the form where the payment information is shown.
Actual Behaviour:
“Date” is missing after “Expiration” label in the payment information
Expected Behaviour:
Label should be called “Expiration Date” instead.
